i Sequence 6, Application US/09186489
patent No. 6375947
GENERAL INFORMATION:
i APPLICANT Sholen, Paul L.
i APPLICANT: Charpf Jr., Lewis G.
i TITLE OF INVENTION: Purified Recombinant Kid Pregastric Esterase, and
TITLE OF INVENTION: Processes for its Production and Use
TITLE REPERENCE: 5499/3
CURRENT APPLICATION NUMBER: US/09/186,489
CURRENT APPLICATION NOWNER: US/09/186,489
CURRENT APPLICATION NOW: 2.0
SOFTWARE: Patentin Ver. 2.0

Sequence 399, Application US/10212679

Publication No. US20030125536A1

GENERAL INFORMATION:

APPLICANT: Hist, Shannon Kathleen

APPLICANT: Dillon, Davin

APPLICANT: Poy, Teresa

APPLICANT: Poy, Teresa

APPLICANT: Poy Teresa

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE THERAPY

TITLE OF INVENTION: AND DIAGNOSIS OF BREAST CANCER

FILE REFERENCE: 210121-419C14

CURRENT APPLICATION NUMBER: US/10/212,679

CURRENT FILING DATE: 2002-08-02

Sequence 47, Application US/08467023

Patent No. 6090386

GENERAL INCORMATION:

APPLICANT: Giffeth, Irwin J.;
APPLICANT: Garman, Richard D;
APPLICANT: Exley Siu-mei H.;
APPLICANT: Exley Mark A.;
APPLICANT: Waltham
STREET: 610 Lincoln St CTTY: Waltham
STATE: 610 Lincoln St CTTY: Waltham
STATE: 10.2154
COMPUTER READABLE FORM:
MEDIUM TYBE: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARR: BREET PROPHY:
APPLICATION NUMBER: US/08/467, 023
FILING DATE: Unne 6, 1995
CLASSIFICATION NUMBER: 08/350,225
ATTONNEY/AGENT INFORMATION:
TELEPAN: Gil) 227-740
INFORMATION FREE EX Remillard

Sequence 57.7 Application US/09142524D

Patent No. 6719976

GENERAL INFORMATION:

APPLICANT: Sone, Toshio

APPLICANT: Name, Akinori

PILE REFERENCE: SPO-103

CURRENT FILING DATE: 1998-09-09

PRIOR PILING DATE: 1997-03-10

NUMBER OF SEQ ID NOS: 174

SOFUTANE: PatentIn version 3.1

LENGTH: 15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  GENERAL INFORMATION:

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 48,

i Sequence 49, Application US/08467023

i Patent No. 6090386

i GENERAL INFORMATION:

APPLICANT: Griffeth, Irwin J.;

APPLICANT: Pollock, Joanne;

APPLICANT: Bond, Julian F;

APPLICANT: Reaman, Richard D;

APPLICANT: Wan, Mei-Chang;

APPLICANT: Kuo, Mei-Chang;

APPLICANT: Kauer, Andrew;

APPLICANT: Exley, Mark A.;

APPLICANT: Exley, Mark A.;

APPLICANT: Downers, Steven P.

ITILE OF INVENTION: Allergenic Proteins And Peptides From TITLE OF INVENTION: Japanese Cedar Pollen

NUMBER OF SEQUENCES: 261

CORRESPONDENCE ADDRESS:

ADDRESSEE: ImmuLodic D**

MEDIUM TYPE: Ploppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/467,023
FILING DATE: June 6, 1995
CLASSIFICATION: 424
PRIOR APPLICATION DATA:
APPLICATION NUMBER: 08/350,225
FILING DATE: December 6, 1994
ATTORNEY/AGENT INFORMATION:
NAME: Jane E. Remillard
REGISTRATION NUMBER: 38,872
REFERENCE/POCKET NUMBER: 38,872
REFERENCE/POCKET NUMBER: 38,872
REFERENCE/POCKET NUMBER: 025.6 USD2 (IMI-028CPD2)
TELECOMMUNICATION INFORMATION:
TELEFFAX: (617) 227-7400
TELEFFXX: (617) 227-7400
TELEFFXX: (617) 227-7401
TELEFXX: (617) 227-7591
INFORMATION FOR SEQ ID NO: 258:
SEQUENCE CHARACTERISTICS:
LENGTH: 19 amino acids
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 5, Application US/08075541D

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Description
